Descripción

Este proyecto nace como necesidad de motivar y conectar con el alumnado del programa de cualificación profesional inicial (**PCPI**) de Reprografía del [IES La Plana](#). El perfil de estos alumnos es de jóvenes entre 15 y 17 años que corren riesgo de abandonar la enseñanza reglada, normalmente desmotivados, incapaces de reconocer sus destrezas o habilidades y aburridos del sistema educativo tradicional. Aún así, tienen mucha energía y **capacidades ocultas** que gracias al proyecto han sabido canalizar y desarrollar.

La idea surge a partir de plantear el crear una *empresa de reprografía* para dar servicio real al centro educativo, de esta manera se desarrollan todos los contenidos y habilidades planteadas en las asignaturas del ámbito profesional. Para llegar a este proyecto los alumnos debían de realizar diferentes pasos o pequeños proyectos hasta llegar a la creación final de su empresa. Desde el planteamiento de un nombre o un logo hasta la distribución del espacio. Así nace [Reprographic Students](#)
