

MONOGRÁFICO: Nubes de palabras con Tagxedo, Wordle y Word It Out

Escrito por Avelino García Marquina
Luns, 25 Abril 2011 10:29

Ese conjunto de palabras puede ser obtenido de un texto, de una página web a través de su URL y del conjunto de etiquetas de un sitio web (marcadores sociales, blogs,...).

La imagen resultante resalta las palabras que aparecen con mayor frecuencia en el texto o página web seleccionada, mostrándolas con un tamaño mayor o con un color más intenso. Los programas generadores de nubes de palabras descartan por defecto los artículos, las preposiciones y los signos de puntuación, así como los números, aunque pueden ser configurables estas premisas.

Una vez obtenida la imagen que representa a la nube de palabras, podemos definir la estética de dicha imagen seleccionando paletas de estilos y colores, tipos de letras, formas y siluetas, orientación de las palabras,...

La imagen resultante puede ser guardada en nuestro ordenador con diferentes formatos, o publicada en el servidor de la aplicación con la que la generamos, obteniendo en este último caso la URL pública para poder compartirla y el código para poder embeberla en un blog, página web o plataforma de contenidos.

Vamos a mostrar tres aplicaciones de generación de nubes de palabras: Tagxedo, Wordle y Word It Out. También os mostraremos algunas utilidades de estas herramientas en el entorno educativo.

TAGXEDO:	programa generador de nubes de palab
-----------------	--------------------------------------

MONOGRÁFICO: Nubes de palabras con Tagxedo, Wordle y Word It Out

Escrito por Avelino García Marquina
Luns, 25 Abril 2011 10:29

Se trata de una aplicación on-line que no precisa ningún tipo de instalación en nuestro equipo y no es necesario suscribirse ni crear una cuenta para poder elaborar una nube de palabras con todas las funcionalidades. El interface está en inglés pero es muy intuitiva y utiliza un lenguaje técnico fácilmente comprensible.

Podemos acceder a esta herramienta a través de su [página](#) .

-- Announcement --

If you love Tagxedo, please consider supporting the 'Continents in Tagxedo' project at KickStarter. Your financial contribution allows me to continue offering Tagxedo for free, and without advertisement. Every bit helps, even pledge as small as \$1. Get pledges will also be rewarded with these creative, unique, and beautiful posters - a great gift you simply won't find anywhere. Need more persuasion? Please read my [blog post](#), or check out the video in the [project page](#). Thanks!

-- Hardy Leung (Tagxedo creator)

Welcome to Tagxedo, tag cloud with styles

Tagxedo turns words -- famous speeches, news articles, slogans and themes, even your love letters -- into a visually stunning tag cloud. Words are individually sized appropriately to highlight the frequencies of occurrence within the body of text.

FAQ

Adv

Wordle is a toy for generating “word clouds” from text that you provide. The clouds give greater prominence to words that appear more frequently in the source text. You can tweak your clouds with different fonts, layouts, and color schemes. The images you create with Wordle are yours to use however you like. You can print them out, or save them to the Wordle gallery to share with your friends.

The screenshot shows the WordItOut website interface. At the top, there's a navigation bar with 'Create', 'Discover', and 'Community' tabs. Below this, a large heading reads 'Transform your text into word clouds!'. To the left, a text box explains what a word cloud is and provides a 'Create your own' button. To the right, there's a preview of a word cloud generated from the text 'Alice in Wonderland by Lewis Carroll'. Below this, a section titled 'Great idea: make personalised gifts!' shows a mug with a word cloud on it. Further down, a 'Features' section lists various customization options. On the right side, there are links to 'Face Yoga by Danielle Collins' and 'Study Skills'. At the bottom, a 'BRAIN TRAINING GAMES' section is visible. The 'Create your own' button is highlighted with a red box, and the 'Make a word cloud' form is shown below it. The form has a text area for 'Original source' and a 'Word it out!' button. A green box at the bottom of the form contains a note about the types of text that can be used.

Transform your text into word clouds!

What's a word cloud?
An attractive arrangement of randomly positioned words, where the most important words are bigger than the others.

What are they for?
Mostly for fun! ...and now you can print them automatically onto items: a great idea for making custom gifts! Plus they are fantastic at summarising large documents (reports, speeches, questionnaires, etc), teaching kids and more...

Discover other examples Create your own

Alice in Wonderland by Lewis Carroll

Features

WordItOut is the word cloud generator that gives you control with many custom settings. Free to use and no sign up required!

- Customise more settings than any other word cloud generator
 - Create word clouds from sentences, whole documents, web addresses or tables.
 - Decide how to filter that text, which words to display or remove, and tweak their importance with ease.
 - Design your word cloud as you like, find that perfect layout, choose your own colours, fonts and sizes (and how to mix them), or let WordItOut find a random look for you!
- Keep control of your word clouds
 - Share your word cloud with the world (or keep it secret!)

Make a word cloud

Original source

Enter your original text here:

Word it out!

For example, you could enter a document, a web address (with an associated feed), a simple sentence (with no repeated words), or even a table (common formats are recognised). See our [FAQ](#).
